

Illustrated Price List

No. 66

1828

1915

The

D. Moore Company

Limited

HAMILTON,

CANADA.

Largest Manufacturers Exclusively of
Stoves and Ranges in Canada.

General Offices and Works:

Catharine and Robert Streets.

Wholesale Agencies:

Winnipeg, **J. A. EVANS**, Market and Princess Sts.

Vancouver, **JOHN BURNS**, 329 Railway St.

The D. Moore

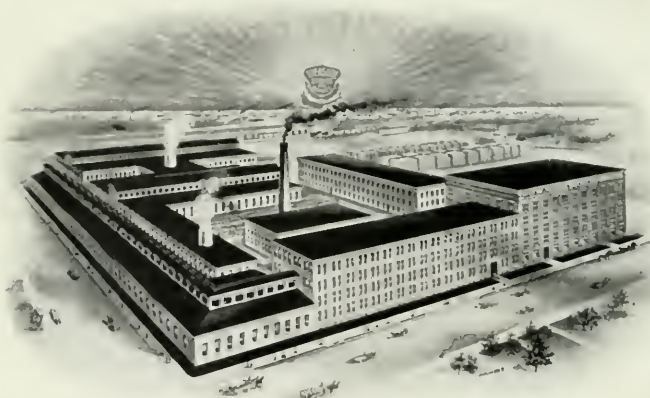

Company.

Our price is no higher than asked for other equal grades of stoves and ranges, and "TREASURES" possess quality and advantages not to be found in other goods of their kind.

Bear in mind that only the HIGHEST GRADE and PUREST PIG IRON are used in the manufacture of Treasure Stoves.

TREASURE NICKEL is whitest, brightest and longest lasting. is put through a special process before and after electro plating.

TREASURE STOVES and RANGES made in Hamilton and sold all over the Dominion of Canada.

OFFICE AND WORKS AT HAMILTON.

Catharine and Robert Streets.

Where "TREASURE" Stoves and Ranges are made.

The D. Moore Company,

Limited

Company.

Draft Check.

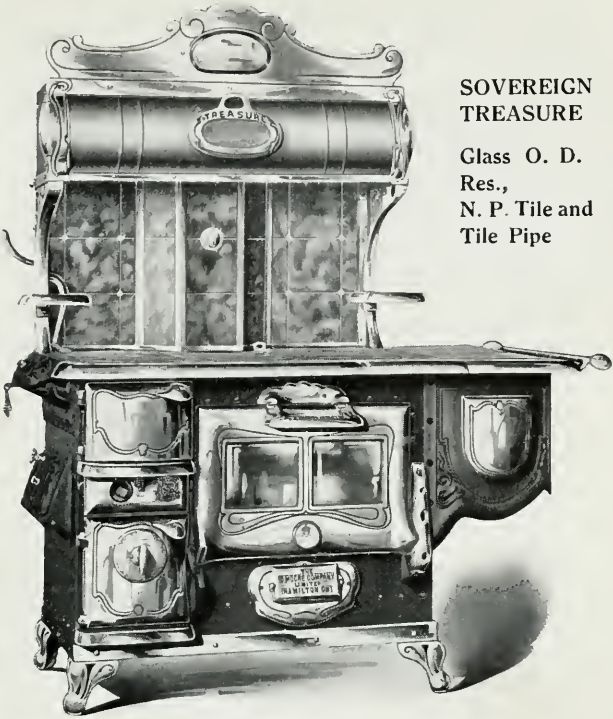

High Grade "TREASURE" Ranges, High Closets are now equipped with our new, Patent Draft Control Device. (Patent applied for.) By a series of notches the Handle is moved from Right to Left, moving automatically inside Check Damper up and down.

Treasure Draft Check can be adjusted to suit any draft. It will stay set at any angle. When the Handle is moved from Right to Left the Damper is automatically lowered, and while it checks fire by obstructing passage like an ordinary Damper, it, at the same time leaves an opening above to let a current of air into Pipe, and thus more effectively check the fire and incidentally take odors from Top Cooking.

When the Handle is at the right side the Damper is shut tight, and the heat, and the smoke go up the chimney uninterrupted.

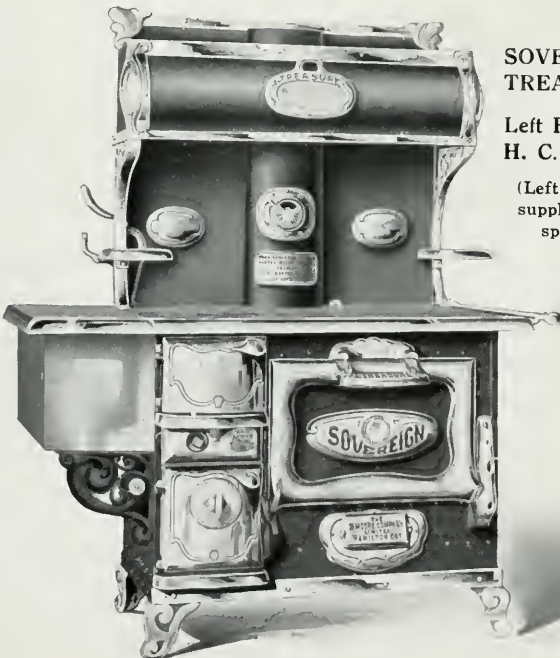

A regular Stove Pipe Damper is located below the Check Draft at the correct distance from the fire, so as to hold heat of the Oven when a very strong chimney draft is encountered.

This Patent Device gives better results than any other Draft Regulator on the market.

Ventilating and Interlocking Fire Box Linings

The three sections of fireback and firefront are so constructed they interlock with each other and therefore cannot warp. They are also interchangeable each section being exactly the same on Othello Treasure Range. On Sovereign Treasure Range the left and centre sections of Front and Back are exactly the same, and are interchangeable.

These sections are connected to a Patent Ventilator Flue which draws the Hot Air from behind, and conducts it to the Flues of Range. This keeps them from burning out and adds additional heat to oven.

Abbreviations and Explanations

The following abbreviations occur throughout parts of this book, to simplify and shorten sentences.

T. S. —Tea Shelf.	Ther.—Thermometer.
H. S. —High Shelf.	Lt. or Rt.—Left or Right Hand.
H. C. —High Closet.	Res.—Reservoir.
N. P.—Nickel Plated.	Wft.—Waterfront.
N. P. —Mirror Guard and N. P. Drop Door.	
Glass O. D.—Glass Oven Door.

TREASURE
B. B.
(or Straight)

ART
TREASURE
P. C. (or
with Oven)

Base Burners

“Art Treasure”

Double Heating Base Burner

Double Heating attachment on all Stoves.

For Coal, Etc.

On Nickel Plated “Never Break” Steel Base and Legs.

The “Art Treasure” is constructed on the most advanced principles, combining every modern and practical idea known to stove builders. Stove sits on Treasure “Never Break” Steel Leg Base, which adds greatly to its appearance. The Swing Top, Removable Jacket and Reflector Top, Side Wings, Name Plate, Ash-Pit Door Panel and Removable Foot Rails are Plated by “Treasure” Special Process Nickel, which makes them whitest, brightest and longest lasting.

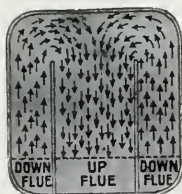

The Duplex Grates are large with Annular Shaking Ring, and will stand more and last longer than any other Base Burner made,

Circular Draft Regulator on Ash Pit Door screws in, not out. With it you secure perfect control of the fire.

Treasure Ash Shelf, Jewel Knobs.

The Oven Flue used in all Treasure Base Burners is so constructed that the fire travels over the oven top, down the back and under the oven at both sides to the base of the stove, and returns up the flue in the centre. You will note by this that the fire travels around the oven twice before entering the chimney, economizing to the extent of about 40%, and baking equal to a cook stove.

“Empire Treasure”

Double Heating Base Burner

For Coal, Etc.

Straight Stoves made in two sizes—Nos. 514 and 515.

Oven Stove one size—No. 514.

Made with the Two Flue Construction, which compels all heated air to come in contact with the entire outside radiating surface, which makes it a very powerful heater. All the Cold Air is taken from the floor, and distributed through the rooms, thoroughly ventilating and heating them.

SIZE 514—WITH OVEN.

The Oven is large and has two eight-inch pot holes, is easily regulated, quickly heated, and bakes to perfection.

Draw-Out Firepot and Grate. Can reverse Fire-pot, making it last twice as long.

Fire will keep in without replenishing for 24 hours or more.

Circular Draft Regulator on Ash Pit Door, Screws in and out, secures an air-tight fit and perfect control of fire.

“Crown Treasure”

Double Heating Base Burner

For Coal, Etc.

Straight Stove made in Four Sizes, 412, 413, 414, 415.

Oven Stove in Two Sizes. 413. 414.

Duplex Grate and Annular Shaking Ring on Empire and Crown Treasure Base Burners operates easily at all times. “No poking necessary.” This style of grate gives room for a large deep fire pot, consequently more radiation and greater heating capacity. Fire pot and grate complete, can easily be replaced without dismantling the stove.

Fire Pot is Reversible, thus making same last twice as long as other pots.

Tea Kettle Attachment has large griddle hole, and will take a good size utensil.

Nickel Ornamentation—Fancy Leg Base, Name Plate, Foot Rails, Top Ornament Extreme Dome Top, including Swing Cover and Jacket, all of which are removable.

Illustrated Price List

No. 66

Winnipeg Edition

1828

1915

The

D. Moore Company

Limited

HAMILTON,

CANADA.

Largest Manufacturers Exclusively of
Stoves and Ranges in Canada.

General Offices and Works:

Catharine and Robert Streets.

Wholesale Agencies:

Winnipeg, **J. A. EVANS**, Market and Princess Sts.

Vancouver, **JOHN BURNS**, 329 Railway St.

The D. Moore  Company.

Our price is no higher than asked for other equal grades of stoves and ranges, and "TREASURES" possess quality and advantages not to be found in other goods of their kind.

Bear in mind that only the HIGHEST GRADE and PUREST PIG IRON are used in the manufacture of Treasure Stoves.

TREASURE NICKEL is whitest, brightest and longest lasting, is put through a special process before and after electro plating.

TREASURE STOVES and RANGES made in Hamilton and sold all over the Dominion of Canada.

OFFICE AND WORKS AT HAMILTON,
Catharine and Robert Streets,

Where "TREASURE" Stoves and Ranges are made.

The D. Moore Company,

Limited

HAMILTON, CANADA.

Company.

Draft Check.

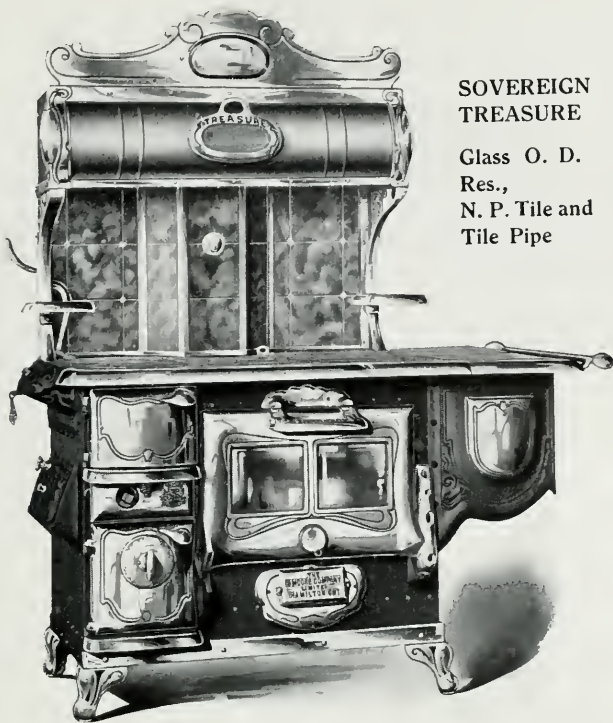

High Grade "TREASURE" Ranges, High Closets are now equipped with our new, Patent Draft Control Device. (Patent applied for.) By a series of notches the Handle is moved from Right to Left, moving automatically inside Check Damper up and down.

Treasure Draft Check can be adjusted to suit any draft. It will stay set at any angle. When the Handle is moved from Right to Left the Damper is automatically lowered, and while it checks fire by obstructing passage like an ordinary Damper, it, at the same time leaves an opening above to let a current of air into Pipe, and thus more effectively check the fire and incidentally take odors from Top Cooking.

When the Handle is at the right side the Damper is shut tight, and the heat, and the smoke go up the chimney uninterrupted.

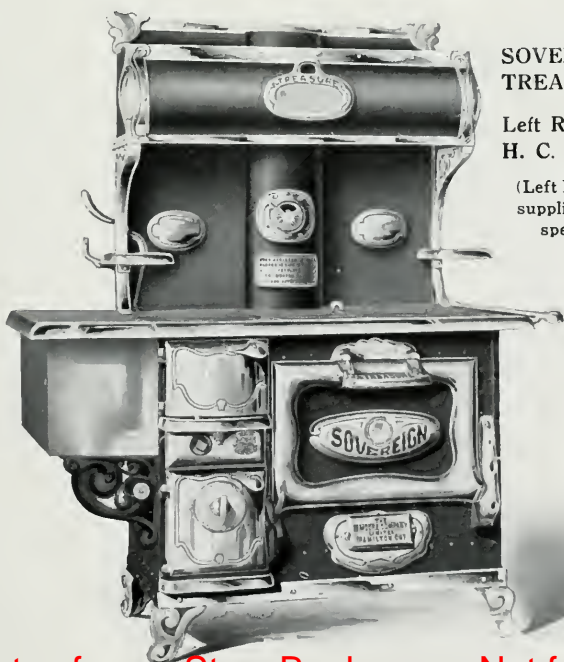

A regular Stove Pipe Damper is located below the Check Draft at the correct distance from the fire, so as to hold heat of the Oven when a very strong chimney draft is encountered.

This Patent Device gives better results than any other Draft Regulator on the market.

Ventilating and Interlocking Fire Box Linings

The three sections of fireback and firefront are so constructed they interlock with each other and therefore cannot warp. They are also interchangeable each section being exactly the same on Othello Treasure Range. On Sovereign Treasure Range the left and centre sections of Front and Back are exactly the same, and are interchangeable.

These sections are connected to a Patent Ventilator Flue which draws the Hot Air from behind, and conducts it to the Flues of Range. This keeps them from burning out and adds additional heat to oven.

Abbreviations and Explanations

The following abbreviations occur throughout parts of this book, to simplify and shorten sentences.

T. S.—Tea Shelf.

Ther.—Thermometer.

H. S.—High Shelf.

Lt. or Rt.—Left or Right Hand.

H. C.—High Closet.

Res.—Reservoir.

N. P.—Nickel Plated.

Wit.—Waterfront.

N. P.—Mirror Guard and N. P. Drop Door.

Glass O. D.—Glass Oven Door.

ART
TREASURE
B. B.
(or Straight)

ART
TREASURE
P. C. (or
with Oven)

Base Burners

“Art Treasure”

Double Heating Base Burner

Double Heating attachment on all Stoves.

For Coal, Etc.

On Nickel Plated “Never Break” Steel Base and Legs.

The “Art Treasure” is constructed on the most advanced principles, combining every modern and practical idea known to stove builders. Stove sits on Treasure “Never Break” Steel Leg Base, which adds greatly to its appearance. The Swing Top, Removable Jacket and Reflector Top, Side Wings, Name Plate, Ash-Pit Door Panel and Removable Foot Rails are Plated by “Treasure” Special Process Nickel, which makes them whitest, brightest and longest lasting.

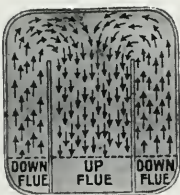

The Duplex Grates are large with Annular Shaking Ring, and will stand more and last longer than any other Base Burner made,

Circular Draft Regulator on Ash Pit Door screws in, not out. With it you secure perfect control of the fire.

Treasure Ash Shelf, Jewel Knobs.

The Oven Flue used in all Treasure Base Burners is so constructed that the fire travels over the oven top, down the back and under the oven at both sides to the base of the stove, and returns up the flue in the centre. You will note by this that the fire travels around the oven twice before entering the chimney, economizing to the extent of about 40%, and baking equal to a cook stove.

“Empire Treasure”

Double Heating Base Burner

For Coal, Etc.

Straight Stoves made in two sizes—Nos. 514 and 515.

Oven Stove one size—No. 514.

Made with the Two Flue Construction, which compels all heated air to come in contact with the entire outside radiating surface, which makes it a very powerful heater. All the Cold Air is taken from the floor, and distributed through the rooms, thoroughly ventilating and heating them.

SIZE 514—WITH OVEN.

The Oven is large and has two eight-inch pot holes, is easily regulated, quickly heated, and bakes to perfection.

Draw-Out Firepot and Grate. Can reverse Fire-pot, making it last twice as long.

Fire will keep in without replenishing for 24 hours or more.

Circular Draft Regulator on Ash Pit Door, Screws in and out, secures an air-tight fit and perfect control of fire.

“Crown Treasure”

Double Heating Base Burner

For Coal, Etc.

Straight Stove made in Four Sizes, 412, 413, 414, 415.

Oven Stove in Two Sizes, 413, 414.

Duplex Grate and Annular Shaking Ring on Empire and Crown Treasure Base Burners operates easily at all times. “No poking necessary.” This style of grate gives room for a large deep fire pot, consequently more radiation and greater heating capacity. Fire pot and grate complete, can easily be replaced without dismantling the stove.

Fire Pot is Reversible, thus making same last twice as long as other pots.

Tea Kettle Attachment has large griddle hole, and will take a good size utensil.

Nickel Ornamentation—Fancy Leg Base, Name Plate, Foot Rails, Top Ornament Extreme Dome Top, including Swing Cover and Jacket, all of which are removable.
