TO THE TRADE

WE have to thank our friends for their continued assistance in marketing our products in Stoves. Our trade during the past year has been very large, and to this date the demand has tested our capacity to the utmost. Our lines will be found to be very full, no possible want of any class of Trade being overlooked.

We have thought it best to keep our Stove line by itself, issuing supplementary Catalogues for Hot Air, Hot Water and Plumbers' Goods, Locks and Scales, which we shall be glad to supply on application.

Yours respectfully,

The E. & C. GURNEY CO., Ltd.

Property of www.StoveBook.com - Not for Resale

WE MANUFACTURE AND SELL

Stoves, Ranges, Charcoal Broilers, Hollow-ware,

Tin Furniture, Stove Pipes, Stove Pipe Dampers,

Stove Boards, Stove Polish,

Brick and Iron Linings, Repairs, Mica,

Hot Water Heaters, Hot Water and Steam Radiators,

Valves, Steam Fittings, Plumbers' Supplies,

Soil Pipe and Fittings, Sinks, Boiler Stands,

Warm Air Furnaces, Registers, Ventilators.

Locks, Scales, Garden Vases, Door Hangers,

Bakers' Oven and General Castings.

See index at back for particulars.

JOHN BULL.

STEEL-PLATE RANGES

Made in All Sizes from Smallest Domestic to Largest Hotel

THIS line of RANGES is in extent and variety unequalled by anything hitherto offered on this continent, there being in the whole line over 100 styles and sizes. We claim in behalf of this Range that it is the most economical in fuel of any made, the heat units being imparted to the cooking process more quickly and therefore more economically than in any other structure made. The Range is made so as to be durable in the highest degree. The Steel used is the best safe steel, being made for this exclusive purpose. The bodies are put together by hand work, and being made of soft, tough steel, in combination with asbestos sheets, thoroughly riveted, will endure for a life time. The castings used are nearly double the weight of castings for ordinary stove construction, and are so made that the stationary parts, such as the top, are outside the fire line, and so free from the danger of cracking by contact with the fire. In the coal Range we are using our patent flexible duplex grate, which, besides being free from the danger of jamming through expansion, is made so as to be removable at the pleasure of the operator, without disturbing the linings, water-front or other permanent fixings of the fire-place.

We ask the most careful examination of these goods, and a comparison of value with anything else that is on the market, confident that the experienced Stove dealer will, in every case, make this his leader. The success of the line is so far assured, that to-day the "JOHN BULL" stands pre-eminent among the Stoves on this market as a selling product.

Kitchen Witch Range Coal or Wood

THIS magnificent Range was constructed by us with a view to uniting at once the highest attainments of artistic designing, excellence of workmanship and finish, and a regard for convenience, which will be promptly appreciated by all consumers. It is superbly mounted with gorgeous trimmings, and the most sceptic cannot but acknowledge that herein it surpasses all competitors.

In this Range, also, we have incorporated the latest and most improved results of modern ingenuity in the direction of Range improvements. We enumerate a few special features: Either Flat Anti-Clinker Grate or our Patent Flexible Duplex Grate; large front feed and broiling door; large end feed door for wood feeding; extra heavy cast or brick lining; interchangeable sectional fire backs; extra heavy rim covers; double cut-off centres; cut top plate; beautiful polished edges; Reed's patent check draft damper; large extended top shelf; cemented oven top; large deep flues, insuring perfect draft, and extra large pipe collar; illuminated mica front fire door; front flush swing hearth plate; large and deep bailed ash pan; extra large oven; ventilated oven door; outside oscillating oven shelf, fully nickeled; nickel towel rod, nobs and pins; nickel panels; oven door pedal attachment; either handsome base skirting or low closet; japanned and decorated reservoir lids and frame; elegant ornamental top guard, with swinging nickeled bracket shelves; water front, if desired; copper reservoir. Special reference to our combination portable shelf and high closet will be found on page 22.

See following pages for prices and cuts of different styles.

Kitchen Witch Range Coal or Wood

Four Holes

WE have spared no expense in making this line attractive, substantial and serviceable, and feel assured that our efforts will be appreciated in this medium price line, which fills a long-felt want in this market. The following are a few of its special features:

Fancy Tea Shelf, with Nickel-Plate Swinging Covers;

Highly Burnished Edges;

Nickel-Plated Panels;

Deep Rich Carvings, to conform with the larger series of this line;

And our Patent Flexible Duplex Grate, which can be removed without disturbing the water-front or fire-bricks, and changed from a coal burner to a wood burner inside of two minutes. This feature in itself is worth many dollars, as it brings cost of repairs to a minimum.

Novel Standard Coal or Wood

THE Novel Standard is pre-eminently the most successful Modern Coal Cook in the market, and, as we predicted, has had a large sale. Like the Original Wood Cook, its Sister Stove, it has an individuality of its own, and fulfils Every Claim we made for it when putting it on the market.

In points of construction and general decoration it assimilates so closely to the Original that an extended description is unnecessary.

It is made with or without Reservoir, and can have a Water Front fitted if required.

Windsor Coal or Wood

Square or with Reservoir

THE Windsor is a Heavy Medium Sized Cook Stove, of handsome design, calculated to meet the requirements of the "masses," and will not disappoint the dealer or his customer.

It is modern in its construction, and a "quick baker."

It has a large fire box and a large ash pit, which is supplied with an ash pan.

The oven is large and ventilated, and it is fitted with an outside oven shelf, and a pedal oven door opener or "kicker."

It is provided with a Nickel-plated towel bar and swing tea shelf, and is fitted with Nickel-plated knobs, hinge pins and oven door ornaments.

The Square Stove is furnished with a back top extension shelf.

It is a good "seller," and will not fail to give satisfaction.

JOHN BULL

STEEL-PLATE RANGES

WOOD BURNING

A new departure. Nothing like it made by any other firm. We guarantee its success as a worker

INTRODUCING this entirely unique line of Wood Ranges, we have to say that they have been tested experimentally, and ascertained to be first-class in every respect.

We call special attention to their enduring quality, the body and oven being made entirely of Steel Plate, upon the plan always followed in the construction of goods for the soft coal trade, which corresponds as nearly as may be to the requirements for wood-burning stoves.

Attention is especially called to the fact that the fire-plates, tops, covers, etc., are made of castings nearly, if not quite, DOUBLE THE USUAL WEIGHT provided in ordinary wood stoves, and also to a neat device by which the steel plates immediately exposed to the direct action of the flame are covered and THOROUGHLY PROTECTED by Asbestos, which of course is known to be an INDESTRUCTIBLE material.

We commend this line for a leader to our friends in the Wood Stove trade as being FAR IN ADVANCE of anything ever heretofore provided by ourselves or our competitors.

Original Wood Cook Wood

First-Class in Design

First-Class in Workmanship

First-Class in Operation

THE Original is the only First-Class Wood Cook that has an individuality of its own, distinguishing it from the every day construction offered as "first-class Stoves."

The Original fulfils every pledge we made for it and stands to-day unequalled as a marvel of beauty and practical utility.

Modern ideas and New Improvements make it the most Economical and Convenient Stove ever placed on the market. It has the Largest Oven, Largest Top, Largest Reservoir, Largest Fire Box and Flues.

Every Square Stove can be changed to a Reservoir Stove in ten minutes.

Its Value is apparent at sight, and builds its own reputation.

The lower Oven Door drops and forms a Substantial Flush Oven Shelf, while the upper one retains the heat that is wasted from every Swinging Oven Door Cook Stove.

Points of Construction

Very Deep Ash Pit with Drop Draw Hearth; Heavy Portable Fire Bottom with Dumping Grate; Large High Oven at all points; Extraordinary Width Oven Rack; Cut Long Centre; Solid Extension Shelf on Square Stove; Lined Drop Oven Doors; Elegant Leg Base.

Decorations

Nickeled Door Panels.	Nickeled Swing Shelf.
" " Handles.	" Towel Bar.
" Knobs.	Highly Burnished Edges.
" Hinge Pins.	Japanned Reservoir Covers

Cuts and prices, pages 48 and 49.

Bright Idea Wood

OUR position as manufacturers of Wood Cooking Stoves is at the head of the list, and the improvements shown in this line of Stoves must add to our reputation as makers of first-class and efficient Wood Cooking apparatus.

The "Bright Idea" is at once the best proportioned, the best and most beautiful design, the best made, the best fitted, the most perfect in its operation, and the most durable Wood Cooking Stove ever offered the Canadian Stove Dealer.

The line is large and covers a complete assortment of sizes, which adapts the stove to the requirements of all classes, and which must prove an advantage to the dealer, as it will frequently occur that a sale is spoiled when it is known to the purchaser that the stove offered is the only size made of the pattern, and it is too large or too small, and the effort and time of the salesman is wasted. With the "Bright Idea" this cannot occur.

It is ornamented with Tile and Nickel-plated oven door panel, Nickel-plated knobs, towel rail, teapot shelf, oven shelf and burnished edges.

The fire box is large and fitted with heavy sectional fire-backs, and with dump wood grate.

The Square Top Stoves are all provided with an extension top shelf, which supplies increased top surface.

The Hearth is large, and without lettering (of any kind) or other dirt collecting projections, and will be prized by all neat housekeepers.

The ovens are large, well ventilated and mounted with our new "patent inside oven plates," the object of which is to prevent cracking, increase the surface of the oven, and secure a circulation of air under pans, etc., which will prevent "burning on the bottom." And it is provided with pedal oven door openers or "Kickers."

The Bright Idea is of such construction that a Reservoir Stove can with ease and in a few minutes be converted into a Square Stove and vice versa. The convenience and desirability of this feature must be appreciated by every dealer.

The Bright Idea is a Leader, and dealers who secure the sale of it, will increase their sales in Wood Cooks, and please their customers.

Art Countess

THIS STOVE, by its intrinsic merits has won for itself an unprecedented popularity; and as it becomes better known, is still more eagerly sought after. This we judge by our sales increasing yearly, the season of 1891 being the best we have ever had, our sales larger than any previous year, and the number of encouraging letters received from our customers daily proves that the ART COUNTESS has no competitors.

There is no room for doubt in that for utility, artistic beauty and general design and construction, THE ART COUNTESS stands far in advance of all other Base Burners made.

Sales are now upwards of 40,000.

Cuts and prices, pages 64 and 65

Art Countess

EVERY STOVE is a double heater of extraordinary power; and as a floor ventilator, has no equal. By a patented device the heated air usually confined under the base of Stove is conducted upwards through four corner tubes through the fire chamber to the air compartment in the top of the Stove, and thoroughly heated; from this department of the Stove the heated air is thrown out into the room, or may be conducted to any other room by attaching hot air pipe to collar on stove provided for the purpose.

General features: Rich deep carvings, beautifully designed, plain and highly nickel-plated. The plates and panels are protected by air currents, which prevents the discoloration of the nickel. The doors are fitted with nickel-plated Alaska turnkeys and knobs, which are always cool, and can be operated without ear of burning.

Souris Heater

Soft or Hard Coal, Coke or Wood

The Leader of Its Class.

THE growing demand for a thoroughly satisfactory Boiler-Iron Stove, has induced us to introduce an entirely new set of patterns, which is without question the most powerful, handsome, and satisfactory stove of the kind ever made.

The doors are all mounted on the front of the Stove, as they should be, giving the front a finished appearance. A capacious ash-pit and pan is mounted on each Stove, and so constructed that the grate is no farther from the floor than it would be if there was no ash-pan. The floor is of artistic design, and better than has been placed upon Stoves of this class, and the foot rails are highly ornamented and nickle plated.

The main feed-door latch is of malleable iron, while the body of the stove is of best quality cold-rolled iron, which is far preferable and higher priced than cast steel.

The fire-pot is furnished either single or double. Both are extra heavy, and the inner pot is made in sections which can be easily removed.

The ash-pan is large, and will catch all ashes, and is furnished with a bale so that it can be conveniently handled.

The coal grate is of an approved pattern, and the shaking arrangements are such that the fire can be cleaned, or the refuse and ashes readily dumped into the ash-pan without the escape of dust or ashes into the room.

The wood grate is a patented construction, which can be closed partially or entirely, as may be desired, and, together with tight-fitting dampers with which this stove is supplied, will insure a continuous fire.

The extra heating attachment which takes cold air from the floor, or through a duct from outside, as may be desired, is so constructed that it reduces the inside capacity little, while it wonderfully increases the heating power of the stove.

The line is large, and the range of sizes such as will meet the requirements of all classes of purchasers.

Hageys' King Heater Wood, Etc.

The NEWEST of all Heating Stoves!

The CHEAPEST of all Heating Stoves!

The BEST of all Heating Stoves!

The MOST ECONOMICAL Heating Stove ever invented and placed on the WORLD'S MARKET.

We call your attention to our Patent "HAGEY'S KING HEATING STOVE," made of best Russia iron and sheet steel, and lined with charcoal iron. Ornamented and suitable for bedroom or parlor. We do not hesitate to say it is the best, cheapest and safest quick Heater ever offered.

It is KING HEATER because it devours the whole wood pile, burning knots, chunks, chips, trash, and anything that will go into the 13-inch opening at the top.

It is KING HEATER because it will warm the whole room in five minutes.

It is KING HEATER because no fire can fall from it.

It is KING HEATER because the ashes do not need removing but once a month.

It is KING HEATER because one or two knots or chunks will run it twelve hours in cool weather.

It is KING HEATER because the fire is everlasting.

Weight, 35 pounds, wrapped and crated for shipment, and can be packed full of provisions when hauled over the mountains.

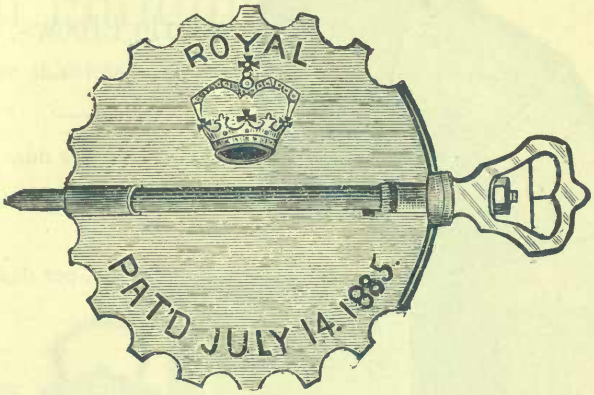
Royal Stove-Pipe Damper



6 inch	Enamelled Handle	$1 50
7 "	"	2 00
6 "	Nickel Handle	1 75
7 "	"	2 25

.....Discount.

This Damper at a glance immediately recommends itself to the practical man for the following reasons:

First—It contains one less piece than any other damper made.

Second—It throws the heat to the surface of the pipe, instead of concentrating it in the centre.

Third—It can be drawn through any thickness of sheet iron without danger of breaking handle.

Fourth—It will save fuel to the user.

Fifth—It is the simplest, handsomest and most durable damper ever put on the market.

Sixth—It is manufactured with japanned or nickel handle.

John Bull Paste Stove Polish

For Family Use

Put up in tin boxes *always ready for use*. Neat, tidy and convenient. It is just the article every housewife will appreciate. In the short space of time this article has been before the public it has met with a sale unprecedented by any article for similar purposes. The decided merits it possesses over all other kinds of polish are at once recognized by every one who uses it.

It is always ready for use without mixing and makes no dust or odor when applied.

It makes a more brilliant and lasting polish than any other kind in the market.

It requires less than one-fourth the quantity than any other kind, and but the labor of a moment to make an old stove look like a new one.

It dispenses entirely with the use of a brush, and when once introduced into a family they will use no other.

Repairs

Recognizing the great necessity for prompt shipment of repairs, we carry at all times a very large stock of such plates, and if customers will assist us by using care in ordering, giving us the requisite particulars, most of the delays, errors and needless expense in this department will be avoided.

Please bear in mind the following requirements:

WHEN ORDERING

Give the full name and number or size; the latest date, when there are any on the stove; state whether for coal or wood. In giving position of plates, face the front of stove, and designate right or left from that position.

When we receive orders which do not give full particulars, we presume that customers wish us to ship according to our best judgment, and we will not be responsible for any errors that may occur thereby. This will apply both to kind of repairs wanted and method of shipping, whether by express or freight.
